

# Briefs: Cable Wireless supplies Caribbean broadband

October 24 2005

---

New Jersey's Cable & Wireless will expand its Caymans-based NetSpeak broadband network to other islands in the Caribbean.

C&W said Monday that NetSpeak's menu of broadband services would be offered to residential customers throughout the West Indies.

NetSpeak is powered by Net2Phone, which has a full-service Session Initiation Protocol VoIP solution.

The service was launched by C&W in the Caymans last May and gave the Caribbean's customers and resort industry a taste of the communications services available through broadband telephony, the company said in a news release.
