

# Motorola launches fully loaded i870

October 31 2005

---

Motorola Monday announced release of its i870, a mobile device that includes a myriad of communications capabilities.

The gadget includes a camera, two-way radio and MP3 player and is constructed with an antimicrobial coating just in time for the winter cold and flu season.

"This safe, non-toxic silver ion technology has been incorporated into

the phone's painted surfaces to help inhibit the growth of bacteria, mold and other microorganisms," Motorola said in a news release.

The i870 is priced at around \$300 and accommodates a removable Transflash media memory card that is available in 128, 256 and 512 megabyte sizes.
