

Movea's Gyration Air Mouse

September 24 2008, by John Messina

Movea's Gyration Air Mouse works both in the air and on the desk. Wave your Air Mouse in the air and navigate your mouse pointer on your desktop. Movea's MotionSense technology that enables it to work both in-air and on desktop by just waving your mouse.

Movea's Gyration Air Mouse uses a proprietary radio frequency technology and has a range of up to 100 feet and also works through walls. The laser sensor enables for precise desktop tracking, making it ideal for working on a desk or other flat surface.

Precision motion sensors guarantee accurate responses to natural hand movements. A simple wrist motion will command presentations, enhanced with Movea's GyroTools presentation effects, or control multimedia entertainment on a laptop or desktop.

The RF-based unit weighs approximately 4 ounces. The RF USB unit stores conveniently inside the mouse and comes with a travel case. The device will be available for purchase in early October with a suggested retail price of \$99.99.
