

Verizon Wireless sees Kindle-type e-readers coming

April 1 2009

(AP) -- Amazon's Kindle might soon be getting new competitors in the market for electronic-book devices.

Tony Lewis, who heads an initiative within [Verizon Wireless](#) to provide access to non-phone devices, says that five companies have approached [Verizon](#) about wireless connections for e-readers.

Lewis wouldn't say what manufacturers Verizon is talking to. But he hints that they are looking at entering parts of the e-book market that the [Kindle](#) doesn't focus on, like college textbooks.

Amazon.com Inc. launched the second version of the Kindle a month ago. It uses Sprint Nextel's wireless network to provide near-instant access to a store with 100,000 books.
