

Storms NASA's only worry for shuttle launch

July 10 2009, By MARCIA DUNN , AP Aerospace Writer

(AP) -- Thunderstorms are threatening to delay NASA's planned launch Saturday of space shuttle Endeavour.

Endeavour is back from a series of hydrogen gas leaks for a third launch attempt. But forecasters say there is a 60 percent chance that storms could force a postponement.

Launch manager Mike Moses said Friday that he's not worrying about the weather since there's nothing he can do about it - even if his name is Moses.

Endeavour is a full month late in blasting off to the [international space station](#). The shuttle and its crew will deliver and install the third and final piece of Japan's huge space station lab.

Seven [shuttle](#) astronauts plus six station residents will make for the biggest crowd ever in orbit.
