

Ornamentals to Brighten the Fall Garden Palette

October 2 2009, By Rosalie Marion Bliss

Two new ornamental peppers—Lil' Pumpkin and Pepper Jack (shown)—from ARS increase the color palette for the garden and Halloween.

(PhysOrg.com) -- With “trick-or-treaters” coming soon, imagine two spirited new pepper varieties making an appearance in your neighborhood as well. The new pepper cultivars have been released by the Agricultural Research Service (ARS) and are trademarked “Lil' Pumpkin” and “Pepper Jack.”

These plants are scheduled to become available in time to add seasonal interest to next year's fall gardens during the Halloween and Thanksgiving holidays.

The peppers were bred by ARS plant geneticists John Stommel and Robert Griesbach, both at the Henry A. Wallace Beltsville Agricultural

Research Center (BARC) in Beltsville, Md. Stommel works in the ARS Genetic Improvement of Fruits and [Vegetables](#) Laboratory, and Griesbach is a former researcher with the ARS Floral and Nursery Plants Research Unit.

Lil' Pumpkin has unique black foliage and orange pumpkin-like [fruit](#). Pepper Jack bears greenish-black foliage and a mix of orange and black, small, cone-shaped fruit, similar to the ever-popular Halloween candy corn.

The breeders developed Lil' Pumpkin and Pepper Jack with both ornamental and culinary markets in mind. The peppers' vibrant colors and unique shapes provide enticing ornamental interest, and their spicy flavor may be of culinary interest to hot-pepper lovers.

Lil' Pumpkin and Pepper Jack join a long list of popular ornamental vegetables that includes kales, lettuces, sweet potatoes and eggplants, as well as culinary counterparts such as multicolored Swiss chard, orange watermelons, purple snap beans and purple asparagus.

The new ornamental garden vegetables can be grown as bedding plants and in containers, and they will be marketed in pots as annuals. Similar to culinary peppers, ornamental peppers perform best in high light and warm temperatures, according to the breeders.

Lil' Pumpkin and Pepper Jack have been licensed for retail sale by McCorkle Nurseries, Inc., in Dearing, Ga. They are scheduled to become available in various garden centers and retail stores nationwide in 2010.
