Nokia N900

Nokia today announced that the highly anticipated Nokia N900 is now on sale in the United States and shipping to consumers who jumped on the opportunity to be among the first to pre-order the Maemo-powered mobile computer. With the Linux-based Maemo platform and with multiple ways to connect to the Internet, the Nokia N900 enables users to be online as it happens with a powerful computer in the palm of their hands.

With the Linux-based Maemo operating platform, 32GB of storage and multiple options of connectivity including access for 3G data networks, consumers no longer need to leave everything that makes them them - their email, favorite websites, social communities, images, music - anywhere but on their Nokia N900. With the Nokia N900, you don't

have to worry about missing that next great moment.

Additionally, with the ability to multitask several applications or web browsers at once, the Nokia N900 allows for users to eliminate boredom wherever they go. Surfing several web pages while listening to music while talking on instant message with friends - all at the same time - couldn't be easier.

Maemo software is based on an open source platform and allows for a variety of different applications to be developed - from home brew to commercial and everything in between; such as podcasting, [Twitter](#) and [instant messaging](#) applications. Consumers and developers can join the conversation with other members and Nokia employees by visiting [maemo.org](#) .

With a [web browser](#) based on Mozilla technology, the Nokia N900 allows consumers to access a world wide web that is more computer-like than before. Consumers can view their favorite websites, use drop down menus, watch Flash videos and access the web on a mobile device screen thanks to support for Adobe Flash 9.4 and gesture support within the Nokia N900 web browser.

The Nokia N900 comes with a 3.5-inch touchscreen, full QWERTY keyboard and enables consumers the ability to personalize up to four different home screens as they wish. One can be work related with a calendar widget and contacts application while another can be favorite bookmarked web pages while yet another can be set to show popular social networks.

The Nokia N900 retains Nokia's legacy of high quality imaging with a five megapixel camera, Carl Zeiss optics and a dual LED flash along the ability to share those images and videos straight from your device to services such as Ovi Share. With Ovi services like Maps and Files, the

Nokia N900 allows users access to their Ovi account right from their device.

The Nokia N900 is available in a black finish and will retail for \$649.
