

Kansas city changes name -- temporarily -- to Google

March 2 2010

A sign is posted outside of the Google headquarters in Mountain View, California. A city in Kansas seeking to be a test hub for a high-speed broadband network being built by Google has temporarily changed its name to... Google.

A city in Kansas seeking to be a test hub for a high-speed broadband network being built by Google has temporarily changed its name to... Google.

Topeka Mayor William Bunten issued a proclamation declaring that, for the month of March, the Kansas capital would be known as "<u>Google</u>, Kansas -- the capital city of <u>fiber optics</u>."

The official city website, Topeka.org, welcomes visitors to "The City of Google" -- written in the large colorful letters the Internet search giant is known for -- and includes a link to the mayor's proclamation.

Google announced last month that it planned to build experimental, ultra high-speed broadband networks that would deliver Internet speeds 100 times faster than those of today.

The Web search and advertising giant said the envisioned one-gigabitper-second networks would be built in "a small number of trial locations" in the <u>United States</u>."

Communities seeking to take part in the experiment have until March 26 to make their interest known to Google. The selected communities will be announced later this year.
