

Facebook unveils revamped online safety site

April 13 2010

Facebook logo

(AP) -- Facebook is unveiling a revamped internal site designed to help people stay safe while surfing online.

Facebook's "[Safety Center](#)," which features new tools for parents, teachers, teens and law enforcement, is the first major endeavor from the social networking site and its four-month-old global safety advisory board.

The board is composed of Internet safety groups Common Sense Media, ConnectSafely, WiredSafety, Childnet International and The Family Online Safety Institute.

Some new features of the safety center include four times more content on staying safe, such as dealing with bullying online, an interactive portal and a simpler design.

The presence of sexual predators is a problem for [social networking sites](#) and their users.

Previously, Facebook, based in Palo Alto, Calif., has helped identify, and has disabled accounts of, registered sex offenders. In 2008, [Facebook](#) said it agreed to assist 49 Attorneys General to protect kids against Internet predators.
