

Delta 4 rocket blasts off on GPS mission

May 28 2010

(AP) -- After several day's delay due to technical issues, a Delta 4 rocket has rumbled into the sky from the Kennedy Space Center at Cape Canaveral carrying a GPS satellite.

Officials said the military craft that blasted off Thursday night would be used for national security and navigation.

It's the first of a [new generation of Global Positioning System satellites](#) going into orbit. A dozen such Boeing-built satellites will be launched over the next several years to replace 20-year-old satellites now in service.

This will be the first GPS mission to launch on a Delta 4, after 49 missions launched atop the smaller Delta 2 between 1989 and 2009. Future GPS [spacecraft](#) will be lifted into orbit on the Delta 4, on the Atlas 4 and on ULA's Evolved Expendable [Launch Vehicle](#).
