

# Florida closes down oil-stained Pensacola beaches

June 24 2010

---

A great blue heron stands on an oil containment boom that is being used to protect the beach area from the Deepwater Horizon oil spill in the Gulf of Mexico on June 7 in Pensacola, Florida. Oil from the massive Gulf of Mexico spill reached the white sands of Pensacola in north-eastern Florida, forcing local authorities Thursday to close down area beaches to swimming at the height of summer.

Oil from the massive Gulf of Mexico spill reached the white sands of Pensacola in north-eastern Florida, forcing local authorities Thursday to close down area beaches to swimming at the height of summer.

"There's oil both in the water and in the sand," said Warren Bielenberg, an official with the Gulf Islands National Seashore, one of the areas affected by the spill.

"There's a double red flag, so it's not permitted to swim," he said.

A health advisory was issued for Escambia County and runs from Perdido Key to Santa Rosa Island and the east side of Pensacola Beach, Bielenberg said.

Santa Rosa Island is one of the biggest tourist attractions of the region.

"The beaches are open, but it's not allowed for people to be in the water," said Bielemborg.

"There are some people still going to the beaches," he said. "They are using umbrellas and just enjoying the sun."

Florida Governor Charlie Crist visited the Pensacola beaches on Wednesday to witness the effects of the spill.

"That is disgusting," Crist said. "To see something like this in such a beautiful place is unbelievable."

The wide-spread slick could spell disaster for Florida, one of the world's top destination for tourists, with more than 80 million visitors a year.

Florida officials have mounted an aggressive beach and coastline cleanup effort to stop the oil from reaching state beaches.

Florida's 1,260 miles (2,000 kilometers) of western coastline is home to scores of tourist destinations, natural habitats and an important [fishing industry](#).

At a time of high unemployment in other sectors, tourism in [Florida](#) generates more than a million jobs, bringing the state 65 billion dollars in revenue in 2008.
