

Samsung's new ultra-light N230 combines style and design with easy mobility

June 30 2010

Samsung Electronics today announced the latest addition to its N-Series netbook range - the N230. With a sleek profile, stunning premium black finish and ultra-convenient features, the N230 will appeal to design-conscious consumers looking for the ultimate experience in mobile computing.

No effort has been spared in designing the exclusive N230, with its well-harmonized finish of glossy, mat and patterned black surfaces. Weighing less than 1kg and just 23.2mm thick, it is a super-slim and ultra-portable [netbook](#), perfect for the go-anywhere mobile user. It also features an

ergonomic island keyboard, increasing the stylish looks while reducing users' wrist strain when typing for extended periods.

The N230 netbook is designed to deliver superior convenience, to match the fast-paced demands of its users. It features Samsung Fast Start, which allows users to start working within seconds of pressing the power button, and an innovative [sleep mode](#) which ensures that data is saved to the hard drive, as well as memory, so you'll never have to worry about losing files or documents again - even if the netbook shuts down unexpectedly. The N230 fits seamlessly into active users' lives, matching the way busy mobile workers multi-task.

A long [battery life](#) is vital to a reliable mobile computing experience and the N230 has been designed to provide just that: With Samsung's innovative LED display, optimized processing performance and proprietary Enhanced Battery Life (EBL) solutions, the N230 delivers incredible energy-efficiency. It offers an extensive battery life of up to 7 hours as standard and with an optional long-life battery. This can be extended up to an amazing 13.8 hours (66Wh battery).

While it features a stylish, sophisticated design, these good looks are matched by its superior connectivity. The N230 is equipped with advanced communications technologies like Bluetooth 3.0 High Speed, 802.11bgn [wireless LAN](#) and a factory option of 3G modem. Together, these provide high-speed data transfer and access to the Internet anytime and anywhere.

The N230 is also perfect for users who want to watch films or view photographs. It has a large 10.1" anti-reflective LED display that delivers clear, rich and vivid images. With no mirror effect in bright conditions, users can enjoy their movies wherever on-the-go.

The N230 also comes with Samsung's All-Share, making it exceptionally easy to share digital content between other DLNA (Digital Living Network Alliance) certified Samsung devices like cameras or mobile phones. The technology makes it easy for you to stream HD content from your notebook to your TV or seamlessly share videos and photos with your phone, without the hassle of connecting cables.

The N230 also allows you to quickly copy files, images, music or share information with other PCs, based on a WiFi ad hoc connection. This Easy File Sharing Solution that will enable simple one click connection

without network setting or internet access.

Worry-free mobile computing

The N230 ensures peace-of-mind for mobile workers by including the Samsung Recovery Solution, enabling simple and automatic data back-up. Silent Mode is ideal for sensitive environments, so that you can easily do work in any situation - whether at a library or at a lounge at school.

The N230 will be available globally from 28 June 2010.
