

# Apple's new iPad, iPhone software due in November

September 15 2010

---

A man tests the Apple iPad at an electronics store in Brussels in July 2010. Apple said that a software update to iPad, iPhone and iPod Touch devices in November will let users wirelessly print photos, documents, or graphics.

(AP) -- Apple says the next version of the software that runs iPads and other gadgets will be available in November and will include a way for people to print documents from iPads and other gadgets.

Apple Inc.'s [iPad](#), [iPhone](#) and iPod Touch can handle many tasks once performed by personal computers. People can check e-mail, surf the Web, edit photos and compose documents. Although the gadgets can connect with computers to transfer files, they don't have ports for connecting with printers or USB drives.

The update, iOS 4.2, includes AirPrint for wireless printing. Apple says

it will automatically find printers on local networks and send text, photos and graphics for printing over Wi-Fi.

[Apple](#) says AirPrint will work with a wide range of printers, from inkjets to laser printers.
