

Motorola Mobility buys cloud storage firm Zecter

December 22 2010

Motorola Mobility said Wednesday that it has acquired Zecter, a startup that provides storage and streaming of digital media over the Internet.

Motorola Mobility said Wednesday that it has acquired Zecter, a startup that provides storage and streaming of digital media over the Internet.

Financial terms of the transaction were not disclosed.

Zecter products allow on-demand access from smartphones, tablet computers and personal computers to music, video, photos and documents stored in the Internet "cloud."

Zecter currently offers two products: ZumoDrive, for cloud-based content synchronization and sharing, and ZumoCast, for personal media streaming to any device.

Motorola Mobility, a wholly-owned subsidiary of Motorola, said Zecter will "provide consumers with real-time access to their content."

"Consumers want seamless access to their content and media from wherever they are, while [content providers](#) want to ensure that content remains protected and secure," Christy Wyatt, corporate vice president of software and services for Motorola Mobility, said in a statement.

"We believe that Zecter enables that seamless experience with the necessary security measures, and we are delighted to be able to work with this team," Wyatt said.

[Motorola](#) Mobility, the company's [mobile phone](#) division, is to be spun off from the rest of the company on January 4.
