

Japan's DoCoMo new tablet aims to take on iPad

January 2 2011

A man takes a picture with his mobile phone at an exhibition in Tokyo. Japan's top carrier NTT DoCoMo is to launch a tablet computer running Google software to challenge Apple's hot-selling iPad, a report said Saturday.

Japan's top carrier NTT DoCoMo is to launch a tablet computer running Google software to challenge Apple's hot-selling iPad, a report said Saturday.

DoCoMo will marry the new Google-backed Android operating system with a device made by South Korea's LG Electronics to launch the product in [Japan](#) by the end of March, the Nikkei business daily said, without naming sources.

Users will be able to get on the Internet via DoCoMo's cellular connections, it said, adding pricing and other details were yet to be

decided.

[Google](#) is expected to release a tablet-friendly operating system worldwide in early this year.
