The space shuttle Discovery, and her crew of six astronauts, is scheduled to lift off Thursday afternoon on an 11-day mission to the international space station. (AP Photo/Chris O'Meara)

(AP) -- NASA is just two days out from sending space shuttle Discovery on its final voyage after a nearly four-month delay.

Officials said Tuesday the countdown is going well. What's more, there's an 80 percent chance of good flying weather Thursday. Launch time is 4:50 p.m.

This will be the 39th flight for NASA's oldest surviving shuttle.

Discovery first rocketed into orbit in 1984. This time, Discovery is headed back to the [International Space Station](#). It will drop off a humanoid robot as well as an oversize closet full of space station supplies.

Discovery should have been finished flying by now. [Fuel tank](#) cracks, however, caused the four-month delay. NASA test director Steve Payne says the repaired tank is stronger than ever.
