

Space Image: Endeavour's close up

May 20 2011

Image Credit: NASA

(PhysOrg.com) -- This image of the space shuttle Endeavour's starboard wing was taken by the Expedition 27 crew during a survey of the approaching STS-134 mission prior to docking with the International Space Station.

As part of the survey and part of every mission's activities, [Endeavour](#)

[performed a rendezvous pitch maneuver](#), or back-flip, so that the shuttle could be photographed from a variety of angles.

The image was photographed at a distance of about 600 feet (180 meters).
