

Verizon's Droid X officially gets Gingerbread May 27

May 25 2011, by John Messina

Verizon is officially Gingerbread this Friday; software version 4.5.596.MB810.Verizon.en.US.

(PhysOrg.com) -- The long waited Android 2.3 (Gingerbread) has been officially announced by Verizon Wireless today. Version 4.5.596.MB810.Verizon.en.US will start getting pushed out to users this Friday.

Owners of [Motorola](#)'s Droid X have been patiently waiting for the [Gingerbread](#) release in the hopes of fixing some issues that have been plaguing Motorola's Droid X since it was introduced July of 2010.

Some of the problems Verizon claims will be fixed include:

- Improve contact syncing from multiple accounts
- Email pushes now work when using Exchange Active Sync
- POP3/IMAP emails now show the correct date stamp
- Camera's auto-focus feature improved for low-light photography

Android 2.3 will provide several improvements for the [Droid x](#) device, some of which include:

- Download Manager App
- Updated calendar options
- App groups
- Dock icons
- New user interface and color scheme

Rooted phones will need to be un-rooted before you accept the update for Android 2.3. The updated file size is approximately 112Mb and would be advisable to download it using your Wi-Fi connection if you have an unreliable 3G connection.

For a complete list of enhancements and improvements see the link below for additional information.
