

Google pays tribute to 'Fermat's Last Theorem'

August 17 2011

Google paid tribute on Wednesday to 17th century French mathematician Pierre de Fermat, transforming its celebrated homepage logo into a blackboard featuring "Fermat's Last Theorem."

Google paid tribute on Wednesday to 17th century French mathematician Pierre de Fermat, transforming its celebrated homepage logo into a blackboard featuring "Fermat's Last Theorem."

Google marked what would have been Fermat's 410th birthday by replacing its logo, known as the [Google](#) "doodle," with the problem that vexed [mathematicians](#) for centuries.

In the margin of a book, Fermat wrote that he had found a "truly marvelous proof" to the math puzzle but the margin was too narrow for

him to write it out.

When scrolled over with a mouse, the [Google doodle](#) echoes Fermat's famous words saying: "I have discovered a truly marvelous proof of this theorem, which this doodle is too small to contain."

Fermat's Last Theorem was finally solved by a British mathematician in the 1990s.
