

# Google provides HTC ammo in Apple patent fight

September 9 2011

---

People stand under an advertisement showing HTC smartphones in Taipei in April 2011. Smartphone titan HTC Corp. on Thursday ramped up its patent war with Apple with the help of ammunition provided by Google, the force behind Android mobile software.

Smartphone titan HTC Corp. on Thursday ramped up its patent war with Apple with the help of ammunition provided by Google, the force behind Android mobile software.

Google last week transferred to HTC a set of patents that the Taiwan-based company used to amend intellectual property infringement complaints against [iPhone](#) maker [Apple](#) in the United States.

The global Internet giant confirmed selling the patents to HTC but

referred additional questions to the [smartphone](#) maker.

HTC in August accused Apple of [patent infringement](#) as part of an ongoing legal battle.

In a lawsuit filed in US District Court in the state of Delaware, the Taiwanese smartphone maker charged that Apple violated three HTC-held patents in its [Macintosh computers](#), iPods, iPhones, iPads and other products.

HTC asked the court for damages and to bar Apple from importing into the United States any devices found to be infringing the patents.

It also filed a complaint with the Washington-based US International Trade Commission (ITC).

"We are taking this action against Apple to protect our intellectual property, our industry partners, and most importantly our customers that use HTC phones," HTC general counsel Grace Lei said.

"This is the third case before the ITC in which Apple is infringing our intellectual property," Lei said. "Apple needs to stop its infringement of our patented inventions in its products."

Technology giants have taken to routinely pounding one another with patent lawsuits. Apple has accused HTC and other smartphone makers using Google's Android mobile operating system of infringing on Apple-held patents.

Some of the nine patents that HTC reportedly bought from [Google](#) had belonged to Motorola Mobility, which Google last month said that it is buying for \$12.5 billion in cash.

Motorola Mobility's trove of patents was a key motivation for Google, which is keen to defend Android against its rivals.

"Our acquisition of Motorola will increase competition by strengthening Google's patent portfolio, which will enable us to better protect Android from anti-competitive threats from Microsoft, Apple and other companies," Google chief executive Larry Page said when the Motorola Mobility buy was announced.

Motorola Mobility chief executive Sanjay Jha told financial analysts the US maker of smartphones and touchscreen tablet computers has over 17,000 issued patents and another 7,500 pending.
