

# Asia turns off lights for Earth Hour

March 31 2012, by Madeleine Coorey

---

The Sydney Opera House and the Sydney Harbour Bridge are darkened at the start of the 6th annual Earth Hour. Australia's Sydney Harbour Bridge and Opera House were plunged into darkness for the annual Earth Hour campaign, leading a global effort to raise awareness about climate change.

Australia's Sydney Harbour Bridge and Opera House were plunged into darkness on Saturday for the annual Earth Hour campaign, leading a global effort to raise awareness about climate change.

In a twist to this year's Earth Hour, Dutch astronaut Andre Kuipers will observe from the [International Space Station](#) countries around the world

turn off the lights for 60 minutes from 8:30pm local time and post photos.

From Sydney's sparkling harbour to Egypt's Tahrir Square and New York's [Empire State Building](#), thousands of cities will go dark when the switches are flicked in some 150 countries and territories.

"From the Sydney Opera House it was fantastic," said Marni Ryan, from organiser WWF Australia. "We had the skyline of Sydney all out."

The Pacific island nation of Samoa was the first to make the symbolic gesture, with New Zealand's city landscapes later dramatically darkened as lights on buildings such as Auckland's Sky Tower were cut.

Hong Kong's Victoria harbour waterfront is seen with its lights dimmed during Earth Hour. Australia's Sydney Harbour Bridge and Opera House were plunged into darkness for the annual Earth Hour campaign, leading a global effort to raise awareness about climate change.

In Australia, where the event was conceived, harbourside buildings went dark, along with most big office buildings as some Sydneysiders picnicked on the harbour foreshore by moonlight.

Japan's Tokyo Tower interrupted its sunset-to-midnight lighting to take part, as organisers said the Earth Hour was an opportunity to pray for last year's earthquake and tsunami disaster.

But the just completed 634-metre Tokyo Sky Tree, the world's tallest communications tower, loomed with [blinking lights](#) as it prepared to open to the public in May.

"We will ask the tower's operator to turn off the lights next year," WWF spokeswoman Akiko Ishihara said.

In Hong Kong the city's skyscrapers turned out their lights dimming the usually glittering skyline. Tourists and locals snapped pictures, although many were unaware of what was behind the switch-off.

Since it began in Sydney in 2007, Earth Hour has grown to become what [environmental group](#) WWF says is the world's largest demonstration of support for action on carbon pollution.

Malaysia's landmarks have their lights being switched off for Earth Hour in Kuala Lumpur. Australia's Sydney Harbour Bridge and Opera House were plunged into darkness for the annual Earth Hour campaign, leading a global effort to raise awareness about climate change.

A total of 5,251 cities took part in 2011, as the movement reached 1.8 billion people in 135 countries, it says. Newcomers to the worldwide initiative include Libya and Iraq.

"Earth Hour 2012 is a celebration of people power -- the world's largest mass environmental event in support of the planet," said chief executive of WWF-Australia Dermot O'Gorman.

"And we're seeing hundreds of millions of people in different countries around the world take actions to go beyond the hour in support of positive actions for [climate change](#) and the planet."

In Beijing, Olympic Park's two landmark monuments, the Bird's Nest and Water Cube, were spending an hour in darkness.

And in Singapore, 32 malls -- many located in the glittering Orchard Road shopping belt -- and more than 370 companies including luxury brands such as Louis Vuitton and Armani turned off non-essential lighting.

In Taiwan, the presidential office went dim and in the Philippines, more than 1,780 police stations and training centres will turning off all non-essential lights and electrical equipment.

"We will turn off the lights in the offices but not the lights in the perimeter because our detainees might escape," said Philippine national police spokesman Superintendent Agrimero Cruz earlier.

Young people light up candles in the square outside Hanoi Opera House to mark the sixth global Earth Hour in Hanoi. Australia's Sydney Harbour Bridge and Opera House were plunged into darkness for the annual Earth Hour campaign, leading a global effort to raise awareness about climate change.

In the Indian capital New Delhi lights at three iconic monuments, India Gate, Qutub Minar and Humayun's Tomb were being switched off, while in Mumbai people gathered on the streets to light candles.

"We have a lot of power cuts in our neighbourhood so we're used to going without power, but my kids want to turn out the lights for [Earth Hour](#) -- they've been learning about energy conservation at school," Delhi mother-of-two Sangeeta Dayal said.

As the movement spreads across the planet buildings such as The Burj Khalifa in Dubai, the Eiffel Tower and Louvre in Paris, the cupola of St Peter's Basilica in the Vatican and Buckingham Palace in London will dim their lights.

The effort will also be observed by the International Space Station, where Kuipers is hoping to share photos and live commentary as he watches from above.

"There is no better way to raise awareness for the future of the most beautiful planet in the universe," he said earlier this month.
