(AP)—Samsung has unveiled a voice-controlled camera as part of a fall lineup of consumer gadgets aimed at setting itself apart from rival Apple.

The South Korean electronics giant presented the 16-megapixel Galaxy

Camera at the IFA tech show in Berlin on Wednesday.

It comes days after Samsung suffered a costly defeat in a patent dispute with Apple in the United States.

Samsung's Galaxy Camera runs [Google](#)'s popular Android operating system, giving it features previously restricted to smartphones or [tablet computers](#) such as photo organizing, photo sharing and voice-control.

The company also announced two new phones, the Galaxy Note II and the ATIV S running Microsoft's Windows 8 operating system.

Samsung says the devices will be available in many countries from the end of October.
