

Strong earthquake hits parts of western Indonesia

September 14 2012

(AP)—A strong undersea earthquake has hit parts of western Indonesia, but no tsunami warning was issued and there have been no immediate reports of damage or casualties.

The U.S. Geological Survey says Friday's 6.2-magnitude quake struck at a depth of 20 kilometers (12 miles).

Indonesia's Meteorology and [Geophysics](#) Agency says it was centered about 160 kilometers (100 miles) southeast of Mentawai island, off western Sumatra.

The Indonesian agency said the earthquake was felt in the cities of Padang and Bengkulu and along the southern coast of Sumatra.

Indonesia is prone to seismic upheaval due to its location on the Pacific "Ring of Fire," an arc of volcanoes and [fault lines](#) encircling the Pacific Basin.
