

# Earthquake shakes eastern Indonesia

November 28 2012

---

(AP)—The U.S. Geological Survey says an earthquake measuring 5.5 magnitude has hit the eastern part of Indonesia. There are no immediate reports of damage.

Indonesian [seismologist](#) Fauzi says there is no risk of a tsunami.

The U.S. agency says Wednesday's quake was centered 56 kilometers (35 miles) under the sea.

Indonesia's Meteorology and Geophysics Agency initially reported a quake measuring a preliminary 6.3 magnitude that was centered about 157 kilometers (97 miles) northwest of Tual in the southeastern part of Maluku province.

It said the [epicenter](#) was 12 kilometers (7 miles) deep.
