

Apple appeals decision in case against Samsung

December 20 2012, by Paul Elias

Apple is appealing a judge's refusal to bar Samsung smartphones from the U.S. market after a jury found Samsung used some Apple technology without permission.

Apple's lawyers notified U.S. [District Court Judge](#) Lucy Koh on Thursday that the company would try to overturn her order with the appeal to the San Francisco-based 9th U.S. Circuit [Court of Appeals](#).

Apple Inc. demanded the sales ban after a jury in August found Samsung Electronic Inc.'s had "infringed" six of Apple's patents in creating some two dozen smartphones. The jury ordered Samsung to pay Apple \$1.05 billion.

On Monday, Koh rejected Apple's demand. She said Apple didn't prove that it lost sales to Samsung as a direct result of the patents involved in the case.

Koh is still considering whether to reduce, increase or keep the damage award at \$1.05 billion.
