

Japan's Abe 'to review Fukushima' atomic crisis

December 23 2012

An Air Photo Service picture shows the Fukushima power plant's number three (left) and four reactors shortly after the earthquake and tsunami hit Japan in March 2011. Japan's incoming pro-nuclear premier Shinzo Abe said Sunday his government will again investigate the Fukushima atomic crisis, after which the country's reactors could be restarted, reports said.

Japan's incoming pro-nuclear premier Shinzo Abe said Sunday his government will again investigate the Fukushima atomic crisis, after which the country's reactors could be restarted, reports said.

His comments will add to [speculation](#) that plans to ditch [atomic power](#) in disaster-scarred Japan will be shelved by his Liberal Democratic Party (LDP) when it takes power after scoring a landslide election win last week.

"We are yet to completely clarify what went wrong (in Fukushima)," he told a political show on Fuji TV on Sunday.

"As a government, we want to once again analyse why Fukushima Daiichi failed," he said. He gave no further details and did not set out a timeframe for a probe.

"After that, I wish to think of next steps, including the restart of [reactors](#)," he said on the programme, according to [broadcaster](#) NHK.

"Could it have been avoided? Was it a man-made disaster? As a government, we must study that," said Abe, according to Jiji Press.

He has previously derided the zero-nuclear goal of the ousted Democratic Party of Japan as unrealistic.

All but two of Japan's 50 reactors remain switched off after the worst atomic accident in a generation and anti-nuclear sentiment has run high, but that failed to translate into support at the polls for anti-atomic parties.

Several probes have already been conducted into the accident in March last year, which saw the Fukushima plant suffer meltdowns and [explosions](#) after being hit by an earthquake-triggered tsunami.

A damning parliamentary report in July concluded that the Fukushima accident was a man-made disaster caused by Japan's culture of "reflexive obedience" and not just the tsunami that hit the plant.

Shares in Fukushima operator TEPCO have soared since Abe's election win.
