

T-Mobile to get Apple devices soon, iPhone likely (Update)

December 6 2012, by Barbara Ortutay

In this Friday, Sept. 21, 2012, file photo a customer tests the new iPhone 5 at the Apple store in Hong Kong. T-Mobile will likely start carrying the iPhone next year after its parent company, Deutsche Telekom, said it has reached a new deal with Apple. T-Mobile USA had been the lone iPhone-less carrier among the four national wireless companies in the U.S. Although it has been possible to use iPhones on T-Mobile networks, customers had to provide the phones themselves. The phones also work at much slower speeds, though T-Mobile has been reshuffling its network to match or exceed AT&T's data speeds. (AP Photo/Kin Cheung, File)

(AP)—T-Mobile will likely start carrying the iPhone next year after its parent company, Deutsche Telekom, said it has reached a new deal with Apple.

T-Mobile USA had been the lone iPhone-less carrier among the four national wireless companies in the U.S. Although it has been possible to use iPhones on T-Mobile networks, customers had to provide the phones themselves. The phones also work at much slower speeds, though T-Mobile has been reshuffling its network to match or exceed AT&T's data speeds.

The three larger carriers, AT&T Inc., Verizon Wireless and Sprint Nextel Corp., already sell the iPhone, as do many smaller ones.

Deutsche Telekom AG said Thursday that T-Mobile will add Apple products to its portfolio in the coming year. Though it didn't mention the iPhone by name in its press release, that's the product it is most likely referring to. It's possible T-Mobile will also sell a cellular version of the iPad, as the three national carriers do.

Apple spokeswoman Natalie Harrison confirmed the agreement but would not comment further. In an email, T-Mobile also wouldn't mention the iPhone by name, saying only that more details will come "at a later date."

T-Mobile has agreed to combine its cellphone business with MetroPCS Communications Inc. in a deal they signed earlier this fall. The combined company will stay No. 4 among U.S. wireless carriers, though the combination is aimed at letting the two better compete with larger rivals. Deutsche Telekom will hold a 74 percent stake in the combined company. MetroPCS shareholders will own the rest. The deal awaits government clearance.
