

Biden voices interest in new technology for guns

January 11 2013, by Erica Werner

President Joe Biden, accompanied by Attorney General Eric Holder, gestures as he speaks during a meeting with Sportsmen and Women and Wildlife Interest Groups and member of his cabinet, Thursday, Jan. 10, 2013, in the Eisenhower Executive Office Building on the White House complex in Washington. Biden is holding a series of meetings this week as part of the effort he is leading to develop policy proposals in response to the Newtown, Conn., school shooting (AP Photo/Susan Walsh)

Vice President Joe Biden says he's interested in technology that would keep a gun from being fired by anyone other than the person who bought it. He says evidence shows such technology may have curtailed what happened last month in Connecticut when 20 youngsters and six teachers were gunned down inside their elementary school.

Biden commented Friday as he met with representatives from the [video game industry](#). It was the latest in a series of meetings he's held with interested parties as he finalizes the administration's response to the Connecticut shooting.

He said he hopes to deliver recommendations to President Barack Obama by Tuesday.

Biden said that had the Connecticut shooter not had access to guns bought by his mother he might have been unable to otherwise get a gun.
