A private rocket is poised to [blast off Friday](#) on a supply run to the

International Space Station.

The unmanned Falcon rocket is owned by the SpaceX company. The Dragon capsule on board is filled with more than a ton of space station supplies.

[Good weather](#) is forecast for the 10:10 a.m. liftoff from Cape Canaveral, Florida. It's a one-second [launch window](#).

NASA is paying SpaceX to deliver cargo to the space station, and bring back science samples and other goods. This will be the company's third delivery mission.

There's no ice cream this time for the six space station astronauts. The freezers are full. But SpaceX included fruit straight from the orchard.

SpaceX founder Elon Musk hopes to fly people aboard a modified Dragon capsule by 2015.
