

# Rocket launches from Va. carrying student projects

August 13 2013

---

A NASA rocket carrying experiments developed by university students from across the nation has been launched from the Wallops Flight Facility in Virginia.

The Terrier-Improved Malemute suborbital [sounding rocket](#) was launched at 6 a.m. Tuesday.

The experiments were developed through the RockSat-X program with the Colorado Space Grant Consortium. Approximately 40 students and instructors were at Wallops to witness the [launch](#).
