

GM to outfit Chevy vehicles with 4G from AT&T

January 6 2014

(AP)—GM says it will start outfitting most Chevrolet vehicles with 4G cellular capabilities in partnership with AT&T. The technology will let drivers make phone calls and allow passengers to surf the Web without burning through the voice and data limits on their phone plans.

General Motors Co. said at the International CES gadget show Sunday that the 2015 model year Chevrolet Corvette, Impala, Malibu and Volt will be the first to come equipped with the capabilities this year, followed by the Equinox, Silverado, Silverado HD, Spark and Spark EV.

While the hardware will be standard, pricing plans have yet to be announced.

The cellular capability will be integrated with GM's OnStar roadside assistance service. OnStar currently costs upwards of \$199 a year and has more than 6 million subscribers.
