

Image: Satellite sees a Midwest white out

January 8 2014

Credit: NASA/NOAA GOES Project, Dennis Chesters

NOAA's GOES-East satellite captured a Midwestern wintertime "White Out" at 2015 UTC/3:15 p.m. EST on January 6, 2014.

Blowing snow and intensely cold air created dangerous white-out conditions over the Midwest, particularly around the Great Lakes, where [daytime temperatures](#) averaged -20F with a wind chill near -50F.

The GOES-East satellite is managed by NOAA. The image was created at NASA's GOES Project at NASA's Goddard Space Flight Center, Greenbelt, Md.
