

Students discover 7,000-year-old mummy in Chile

May 26 2014

A group of Chinchorro mummies on display in the cultural centre of the La Moneda presidential palace in Santiago, on August 27, 2008

A group of students discovered a 7,000-year-old mummy during a trip to northern Chile, local media reported Monday.

La Tercera newspaper reported that the find was made by chance Saturday during a visit to the Morro de Arica site by local [students](#).

The children, at-risk youths enrolled in an archeology workshop, were performing excavation work when one found a strange shape under dog droppings.

Ancient archeological artifacts have been forced toward the surface following the powerful 8.2 earthquake that rocked the region in April, reports say.

Trip organizer Hans Neira said the discovery of the [mummy](#), part of the Chinchorro culture, showed that the area should be declared a protected zone.
