

Second launch try for space station delivery set for Saturday

January 7 2015, by Marcia Dunn

A Falcon 9 rocket carrying the SpaceX Dragon spacecraft is seen at launch complex 40 after an attempted early morning launch was scrubbed due to technical issues at the Cape Canaveral Air Force Station in Cape Canaveral, Fla. on Tuesday, Jan. 6, 2015. The countdown was halted with just over a minute remaining until launch. (AP Photo/Terry Renna)

SpaceX will try again Saturday to launch a load of groceries and other

supplies to the International Space Station.

The first attempt was halted Tuesday at the last minute because of a problem with the Falcon rocket. The delivery was supposed to occur before Christmas, but was delayed twice in mid-December.

Once the Dragon capsule is on its way, SpaceX will try to land the first-stage booster rocket on a platform floating in the Atlantic. No one has ever pulled off such a touchdown.

SpaceX is one of two [private companies](#) that NASA is using to help keep the space station stocked. The last shipment attempt by Orbital Sciences Corp. ended in an explosion seconds after liftoff from Virginia in October.

Saturday's launch time is 4:47 a.m. EST (0947 GMT).
