

# Precarious future: The battle to save Taiwan's Queen's Head

November 13 2015, by Benjamin Yeh

---

Tourists line up for photos behind Taiwan's ancient "Queen's Head" rock (back centre)

Kin was concerned that paints might damage the rock, while a glass case would preserve it.

"It's a marvellous spectacle—once gone, it will be gone forever," he said.

Neo-Space International has used 3-D technology to record the

measurements of the rock twice each year so that it can be reproduced.

One replica already stands at the entrance to the park and has become a tourist attraction in itself.

Park administrator Kuo Chen-ling played down fears over the rock breaking down.
