It's a big week for gamers now that the long-anticipated Fallout 4 video game is being released. The series takes place in a world decades after nuclear war has destroyed most of civilization. Only those who hid in fallout shelters survived.

While this idea works in a fictional game universe, could humans really

survive for years or even decades in such a shelter?

This week, Reactions looks at the basics of survival in a world riddled with radiation.

Check it out here:
