

2016 preview for the European Space Agency

January 5 2016

2016 will be another full and exciting year for the European Space Agency. This ESA TV video takes a look at what's ahead.

It will be a 'Martian year' in particular with the ExoMars launch next March and with the landing of its descent module in October on the surface of the Red Planet.

2016 will also see the end of the Rosetta quest around its comet. And all the other areas from [human spaceflight](#) to Earth observation, navigation and telecommunications are on the agenda.
