

Video: 'Why do wasps attack?' and other chemistry questions answered

April 7 2016

Credit: The American Chemical Society

Why do wasps become more aggressive after you kill one of the hive members? The answer is the same reason why you should be wary of bees that smell like bananas. Here's another question: Why does some metal rust?

This week, Reactions answers viewers' chemistry questions like these

with some short and sweet chemistry.

Check out the videos here:
