The Oakland Zoo has welcomed two litters of baby warthogs and will soon put the seven piglets on display.

Zoo officials say the [piglets](#) are beginning to explore their surroundings

under the watchful gaze of their moms.

The facility acquired two female warthogs, Frenchie and Alice, from East Coast zoos in 2013. It took a little while, but [zoo](#) officials say the male warthog, Simon, has proven himself quite a catch.

Both female warthogs gave birth last month.

The two litters are being kept apart from one another and from Simon. Frenchie and her litter will be on [display](#) first, followed by Alice and her piglets.

Meanwhile, Simon will be kept in an area enhanced with a new mud wallow to keep him busy.
