

# Volvo plans to sell self-driving car in five years

September 29 2016

---

Volvo Car Corp. plans to sell a self-driving vehicle to consumers in five years.

Volvo CEO Hakan Samuelsson says the car will have a [steering wheel](#), but consumers can pay \$10,000 extra for a full autopilot system that will let them relax while the car drives itself.

Samuelsson says Volvo is already making early versions of the vehicles. They'll be tested on [public roads](#) in Sweden next year and in London and China in 2018.

Volvo's consumer-focused strategy differs from rivals. Ford Motor Co. plans a self-driving car in five years, but it will go into car-sharing fleets.

Samuelsson says self-driving capability is a way to make its cars more premium. Separately, it's working with Uber to develop shared [autonomous vehicles](#).

Samuelsson spoke Thursday at a mobility conference near Detroit.
