Whale watchers in Southern California were treated to a rare sighting of Eastern Tropical Pacific killer whales.

Dale Frink, a photographer and naturalist who runs a whale-watching

cruise, says the five orcas, including a small calf, were seen near Point Vicente on Saturday.

He says the Eastern Tropical Pacific orcas, identified by a darker saddle area behind the [dorsal fin](#), make only rare appearances in Orange County waters. They're more common off San Diego and south to Peru.

California Killer Whale Project researcher Alisa Schulman-Janiger tells the Orange County Register ([bit.ly/2i5Mrkw](http://bit.ly/2i5Mrkw)) that it was her first time seeing the rare type of orca in 35 years of research.

Frink says the boat followed the pod for about a half hour.
