

Cellphone, Wi-Fi coverage goes live at NYC subway stations

January 9 2017

Cellphone and Wi-Fi coverage is now being provided for commuters at each of New York City's many underground subway stations, one year ahead of schedule.

Gov. Andrew Cuomo's office has announced that service for AT&T, Sprint, T-Mobile and Verizon Wireless customers will be available across the city's subway system beginning Monday.

Early delivery of the service was spurred by Cuomo's call to accelerate the project and modernize the Metropolitan Transportation Authority at the beginning of last year.

MTA Chairman Tom Prendergast says he knows connectivity is a big issue for customers and the transit agency is "thrilled" to launch the vital services so far ahead of schedule.

Transit Wireless invested more than \$300 million in the project, which comes at no cost to [commuters](#) and taxpayers.
