

Uber suspends self-driving car program in 2 states

March 27 2017

Uber says its self-driving cars remains suspended in Arizona and Pittsburgh, Pennsylvania, following a crash over the weekend.

There were no serious injuries reported in the incident in Tempe, Arizona on Friday night. Police said the self-driving Uber SUV was obeying the law while the human driver of the other car was cited for a moving violation.

Uber says it is investigating the incident and that there were no passengers in the back seat of the [self-driving car](#).

Multiple automakers and [technology companies](#) are testing fleets of [self-driving vehicles](#). In nearly all cases, the cars have backup drivers who can take the wheel in an emergency.

This is not the first accident involving a semi-autonomous car. Last year, a Tesla driver was killed with the car's Autopilot system engaged.
