

Video: How dragon blood could save your life

July 11 2017

Credit: The American Chemical Society

Chemists have found potential drugs and other really useful compounds in some truly bizarre places in nature.

For example, a natural immune defense in the blood of [komodo dragons](#), a sponge armed with resistance to [bacterial infection](#) or a 400-million-year-old medical workhorse just might save your life someday.

Check out the latest Reactions video to find out how:
