Artifacts from King Tut's tomb are going on tour next year to mark the

upcoming 100th anniversary of the discovery of the Egyptian pharaoh's resting place.

The California Science Center says the exhibit, "KING TUT: Treasures of the Golden Pharaoh," will go on view at the Los Angeles museum in March for 10 months before heading to Europe in January 2019 as part of a 10-city international tour.

The museum says the exhibition represents the largest collection of artifacts and gold from Tutankhamun's tomb ever to go on public display outside of Egypt. It says 40 percent of the items are leaving Egypt for the first and last time before going on permanent display at a new museum being built near the Giza Pyramids in Egypt.

King Tut's tomb was discovered in 1922, more than 3,000 years after his death.
