On Tuesday, Jan. 23, 2018, Mark Vande Hei snapped his own portrait, better known as a "space selfie," during the first spacewalk of the year.

NASA astronauts Vande Hei and crewmate Scott Tingle ventured outside the International Space Station to perform maintenance on the

station's Canadarm2 [robotic arm](#) during a seven-hour and 24-minute spacewalk.

The Jan. 29 scheduled spacewalk to complete maintenance on the robotic hand of the Canadarm2's robotic arm has been postponed to mid-February.
