

Autonomous Waymo vehicle involved in 5-car crash in Arizona

June 18 2018

Police in a Phoenix suburb say a self-driving Waymo vehicle was among five cars involved in a collision, but no serious injuries were reported.

The driver of the Waymo [vehicle](#) told Mesa police that the car was not in [autonomous mode](#) at the time of Saturday night's crash.

Witnesses say another car failed to stop for a red light and crashed into the Waymo vehicle as it was turning left.

The car then struck three other vehicles.

Waymo, whose parent company is Google, did not immediately return a message seeking comment Sunday.

Self-driving vehicles have come under fire since an Uber vehicle in autonomous mode with an operator behind the wheel fatally struck a woman in nearby Tempe.

A Waymo vehicle was struck by a red-light runner last month in the Phoenix suburb of Chandler.
