

Google's latest Doodle featuring dinosaurs created by a second grader

January 8 2019, by Brett Molina, Usa Today

A second grader dreamt up Google's latest playful take on its logo.

The design published Tuesday featuring a variety of dinosaurs forming the Google logo was part of the company's annual Doodle 4 Google contest, where students enter their own creations.

The winning logo for 2018 is by Sarah Gomez-Lane, a second-grade student from Falls Church, Va. She responded to this year's theme, "what inspires me," by creating the dino-friendly logo to share her hopes of becoming a paleontologist.

For the first time, the winner of the contest collaborated with Google designers to create an animated version of the [logo](#). For example, the T-rex at the beginning will play a trumpet, while another dinosaur gobbles up an ice cream cone in one bite.

Gomez-Lane will receive \$30,000 toward a [college scholarship](#), Google said, and her school will get \$50,000 to spend on technology.

Any student from kindergarten through 12th grade can enter the contest. Google is accepting submissions for the 2019 contest through March 18.
