

Magnitude 3.6 quake shakes part of Southern California

April 3 2019

A small earthquake gave some Southern California residents a predawn wakeup call.

The U.S. Geological Survey says the magnitude 3.6 temblor occurred just after 5 a.m. Wednesday and was centered 5 miles (8 kilometers) east of the Orange County city of Yorba Linda. Several tiny aftershocks followed.

The Orange County Fire Authority says it received no reports of damage.

The [geological survey](#)'s "Did You Feel It" website received about 2,400 reports, generally indicating light or weak shaking in the region.

Yorba Linda is a city of about 68,000 residents 35 miles (56 kilometers) southeast of Los Angeles.
