

At least 2.6 million Australians face poverty when COVID payments end and rental stress soars

March 24 2021, by Simone Casey and Liss Ralston

Many Australians whose jobs were decimated by the COVID business shutdowns will soon be waking up to new income shocks and the prospect of rental stress. This is because people whose employers can't afford to keep them on will suddenly lose more than A\$300 per week

when the [JobKeeper](#) scheme [ends on March 28](#). Worryingly, this income shock will happen just days before the payment to people on the [JobSeeker](#) benefit is effectively [cut by \\$100 per fortnight](#).

At that point, all [income](#) support recipients—more than 2.6 million people—will be below the [poverty line](#) and many will face extreme rental stress.

This income shock has been anticipated for some time, but what does it mean for rates of rental stress, particularly in Victoria? Despite [promising signs of recovery](#), Victorian jobs lost in the COVID-induced recession, such as in the hard-hit [business tourism](#) and [live music industries](#), have not bounced back at the same rate as others.

What will happen to rental affordability?

To illustrate this point we have modeled housing affordability for single people who were on either the full-time or part-time JobKeeper rate. In this scenario, they could also get JobSeeker payments at a part-rate because of the temporary increase in the [income-free threshold to \\$300](#). This made them eligible for [Commonwealth Rent Assistance](#) too.

The chart below shows the impacts on income and rental affordability when JobKeeper and [Coronavirus Supplement](#) payments end. Their incomes and the amount of [rent](#) they can afford are roughly halved.

Transitioning from Jobkeeper to Jobseeker weekly income & affordable rent

Full time - Tier 1		CURRENT	Jobkeeper	Jobseeker top up	Total Income	Affordable rent 30% of income	Rent + rent assistance	decrease in weekly income	decrease in affordable rent
			\$500	\$73 + \$75	\$648	\$194	\$265	52.5%	56.6%
Income after March 2021 if the Jobkeeper transitions to Jobseeker			\$308	\$92	\$115				
Part time - Tier 2		CURRENT	Jobkeeper	Jobseeker top up	Total Income	Affordable rent 30% of income	Rent + rent assistance	decrease in weekly income	decrease in affordable rent
			\$325	\$178 + \$75	\$578	\$173	\$245	46.7%	53.1%
Income after March 2021 if the Jobkeeper transitions to Jobseeker			\$308	\$92	\$115				

Impacts of the loss of JobKeeper and Coronavirus Supplement on income and affordable rent. Author provided

Full-time and part-time single workers were able to afford weekly rent of \$265 and \$245 respectively before the withdrawal of JobKeeper. Afterwards, affordable rent goes down to \$115 per week. That's about \$110 less than the [\\$450 median rent](#) (\$225 per person) for a two-bedroom share house in Melbourne.

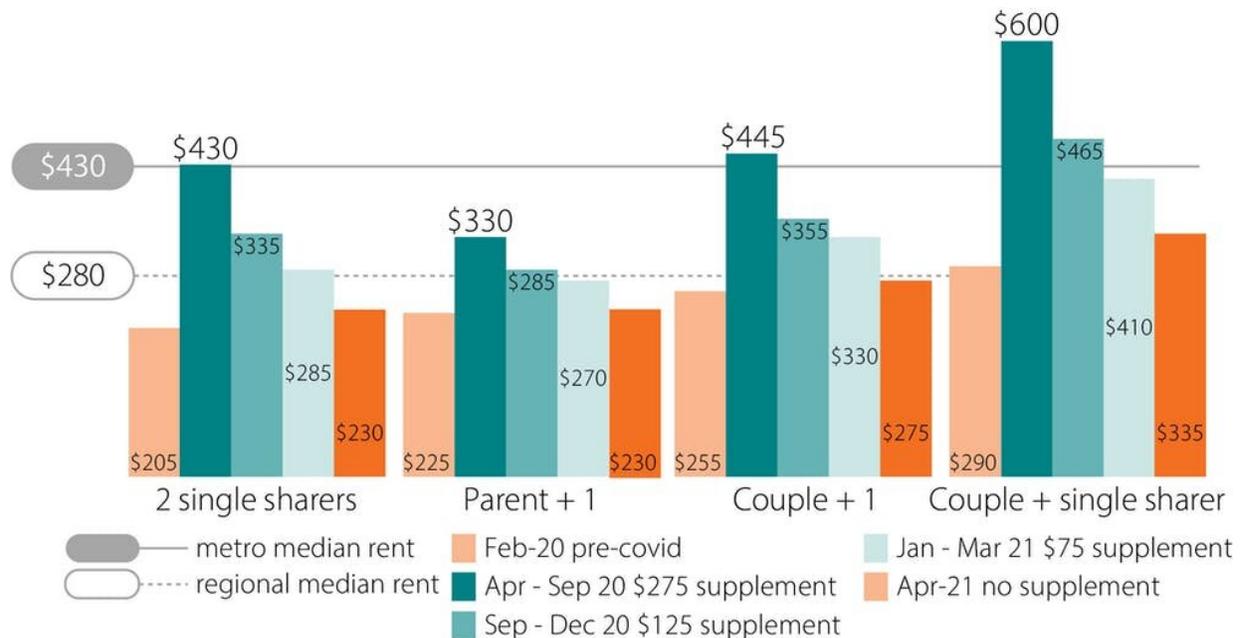

Based on our earlier calculations, this leaves these renters with only \$17.57 per day to meet basic costs. They have a lavish \$3.57 per day more than they did before the pandemic to pay for food, utilities and job-seeking costs such as mobile phone plans and travel cards (A\$4.40 a day in Melbourne).

What is different now than for pre-COVID unemployment was that business shutdowns thrust people who had reliable earnings—and accompanying high rents and mortgages in metropolitan areas—onto JobSeeker and JobKeeper payments.

The chart below shows the change in rental affordability for a number of household types before the pandemic and during the Coronavirus Supplement stages (i.e. payments of \$550, then \$250, then \$150).

For example, when their income was highest during the \$550 stage, two singles sharing could afford rent of \$430 per week. Once the supplement ends and is replaced by the [\\$25-a-week increase in JobSeeker](#) payment, affordable rent declines to only \$230 per week or \$115 each.

Rental affordability for single-parent households is notable here because the COVID Supplement was payable to one person only. Once the supplement is withdrawn, they will again be disadvantaged relative to other households because they will not be receiving the increase in the JobSeeker payment.

Affordable rents by household types with supplement and without.

What sort of job losses can we expect?

It is hard to predict exactly how many people will lose their jobs when JobKeeper ends. What we do know is the [economic recovery](#) in Victoria has lagged behind the other states. We also know that at the end of December 2020 1.55 million people were on JobKeeper and a large proportion of them (626,000) were in Victoria.

Economist Jeff Borland [conservatively estimates](#) national job losses could range between 125,000 and 250,000. It is reasonable to expect as many as half of these could be in Victoria.

Our analysis also shows there are worrying signs that the economic recovery celebrated in the January labour force data was not sustained in February. The latest data provided to a [Senate inquiry](#) into COVID-19 show JobSeeker recipients increased by 7,267 between [January](#) and [February](#). The increase in Victoria could be attributed to the temporary Christmas retail boom, but in states like New South Wales and Queensland claims decreased slightly.

While [fewer people](#) will lose their jobs in other states than in Victoria when JobKeeper is withdrawn, they are not immune to this income shock. We created the chart below to show the overall scale of the coming problem of rental stress when the fortnightly \$150 Coronavirus Supplement disappears and is replaced by the \$50 JobSeeker increase.

Once the supplement reduced to \$250 per fortnight, singles and single parents with two children were below the poverty line. When it was reduced to \$150, the number of household types in poverty increased again. From April 1, all income support recipients—covering more than 2.6 million people including children—will be waking up to poverty and the prospect of extreme rental stress.

April - September 2020
 Supplement: \$275 per week

single 1 person, couple 2 people, one parent families 2.5 people, couple with children 4 people

Households and people on income support falling under poverty line as COVID supplement reduces (based on DSS data February 2021)

What can be done to avoid this?

So how can governments prevent people from falling off the rental cliff? It is unlikely to be achieved by introducing [cut-price flights](#) to Far North Queensland.

A new range of strategies will be needed. These include options [advocated by ACOSS and others](#) to increase the maximum rate of Commonwealth Rent Assistance by 50%, increase the JobSeeker base rate above the poverty line and introduce rental stress grants targeted at individuals who need help.

Over the longer term, there is also a need to adopt strategic approaches to increase the supply of affordable rental housing such as those [recommended by researchers](#) at the Australian Housing and Urban Research Institute (AHURI).
